SOULFUL DINING

MINDFULNESS & MINDFUL MESS

WE EMBRACE THE WONDERFUL MESS WE ARE
AND CELEBRATE EVERY ASPECT OF OUR SOUL.

For me, a home reflects a soul. This place has a huge impact on how I feel and the constant evolution of who I am and aspire to be. You can immediately sense, upon entering a space, if it aligns energetically, aesthetically and emotionally. This feeling emanates from a specific balance within that space. I feel it instantly when entering a hotel, a restaurant or a coworking space.

This balance has to be right. The perfect dining experience only comes to life when concept and experience align with the host's soul. It goes far beyond just serving delicious food. All senses are stimulated, immersing you in the universe of their specific experience.

A perfect example is "The dining experience that doesn't end". The founder managed to fully translate her vision into food with a central focus on experience. Through depth and a soulful moment, an inexhaustible source of energy emerged, so to speak. The result? A dining experience that did not seem to end.

For me, Pomax' strenght lies in the totality, the look, and the experience of the entire collection. I am currently working on translating that overall experience into a soulful dining collection that meets the specific needs of the hospitality sector.

Charles
